Online Safety Management Training Course

Training Area: Flight Safety and Safety Management

Purpose of the Course:

This course provides theoretical principles related to the implementation of ICAO SARPs and fundamental concepts of Safety Management Systems (SMS) and State Safety Programs (SSP). This online course is a mandatory prerequisite for the classroom course.

Learning Objectives:

After having successfully completed this programme, the participants will be able to:

- Apply the fundamental concepts and principles of aviation safety management;
- Participate in the SSP/SMS implementation plans based on the frameworks provided in ICAO safety management Standards and Recommended Practices (SARPs), Annex 19 and guidance material, such as the Safety Management Manual, Third Edition – 2013; and
- Participate in the resolution of safety-related issues by applying the required skills and knowledge associated with the key SSP/SMS processes

Target Population:

The training is most beneficial for those who work for a State regulatory body involved in the planning, development, and implementation of State Safety Programmes and for staff who work for an aviation service provider involved in the planning, development and implementation of Safety Management Systems.

Duration:	Delivery Mode:	Level:	Language of Instruction:
10 – 14 Hrs	e-Learning	Technical	English

Location:	Tuition Fee:	Requirement:
Any location	THB 24,500 (CATC) <small>(VAT 7% Included)</small>	Personal computer with Internet connection

Remark:

ICAO Safety Management Training Programme (ICAO SMTP) consisted of two individual parts:

- Part 1 - Online Safety Management Training Course
- Part 2 - Safety Management Systems for Practitioners (SMxP) - Classroom
